Summary

Highly skilled **Senior Frontend Web/Mobile App Developer** with 10 years of professional experience in building dynamic, scalable applications and leading development teams across diverse industries. Expert in **architecting** and deploying cloud-native applications, **microservices**, and **serverless** solutions using technologies such as **React (Native),Flutter, Node.js, OpenAI, PHP, AWS, Google Cloud** and **Azure**. Adept at enhancing user experiences with modern frontend frameworks like **Vue.js(Vue 2, Vue 3)** and **Angular**, and backend services using **NestJS**, . Extensive experience in building robust API, including designing and optimizing both **RESTful** and **GraphQL API**. Proven track record in optimizing system performance, reducing operational costs, and driving product innovations, including the development of high-performance data-driven platforms and real-time systems. Passionate about leveraging cutting-edge technologies like **OpenAI API** and **LangChain** to solve complex challenges. Demonstrated leadship ability to collaborate effectively within cross-functional teams, mentor junior developers, and drive product initiatives from concept to deployment.

Key Competencies

Full-Stack Development	Database Management	Agile Methodologies
Frontend Development	API Design and Integration	Test-Driven Development (TDD)
Backend Development	Cloud Architecture and Deployment	Microservices Architecture
Mobile Application Development	DevOps & CI/CD Pipelines	Version Control & Collaboration
AI Systems Design & Implementation	Design Patterns & Best Practices	Project Leadership & Management

Work Experience

Senior Software Engineer | Insurego Inc | 2022.10-Present | Ontario, Canada

- Built dynamic and responsive single-page applications using **React, Redux**, for Amazon's ecommerce platform and insurance automation workflow ,contributing to a 10% increase in user acquisition and sales and updated mobile version using **Flutter**
- Architected and implemented a scalable **microfrontend architecture** using **react** and **next**, achieving a 40% reduction in server costs by optimizing resource allocation.
- Led the development of a search and dashboard website, building the infrastructure from scratch using **React, TypeScript, Next.js, GraphQL, Jest**, and **Cypress..**
- Designed and implemented scalable server-side applications using **Node.js(Express.js, NestJS)** and **MongoDB**, boosting server efficiency.
- Improved performance and added new features on existing search websites using **TypeScript ·Next.js · GraphQL · React.js · Jest · Nest.js · Redis · Elasticsearch · MongoDB**, Spinnaker, Vault,Gemfury, etc.

- Integrated AI capabilities through **OpenAI API**, **RAG** pipelines, **LlamaIndex**, **Pinecone**, and other advanced tools for intelligent data handling.
- Spearheaded the transition from Waterfall to **Agile methodologies** and integrated **CI/CD pipelines**, resulting in reduction in time-to-market for new product features through improved workflow efficiency.

Mid-Senior Web/Mobile Engineer | Hack/House | 2020.05-2022.09 | New York, US

- Developed a custom analytics dashboard using **Angular**, **NgRx** that provided real-time data visualization, improving stakeholders' decision-making with an uplift in data accessibility.
- Redesigned the app's music streaming component leading to a 15% increase in playtime using **React Native** and **SVG** animations.
- Led a cross-functional team of 3 developers in adopting both **GraphQL-native** and **RESTful API-driven continuous integration/continuous deployment (CI/CD)** practices, resulting in a 40% increase in deployment frequency and a 60% reduction in post-release bugs.
- Designed and implemented **Micro Frontend** architecture using **React**, **Redux-saga** and Module Federation, enabling independent team deployments and reducing application build times.
- Integrated **WebRTC APIs** into existing applications to enhance functionalities such as video conferencing, live streaming, and peer-to-peer connections.
- Helped to create & maintain code standards with **ESLint**, created **CI/CD** scripts on **Github Actions**, created the bundling & startup app scripts using **Webpack** and **Babel**.
- Worked with 3D engines **Blender/Solid-works** with **OpenGL/WebGL/Three.js** code rendering algebra and computational geometry.
- Implemented AI chatbot functionality using **OpenAI API**, **RAG**, **Langchain**, and **Pinecone** to enhance user interactions and data retrieval. and integrated it into an **Angular** application, improving customer service response times.

Senior Frontend Engineer | Thinkalike Laboratories | 2019.02-2020.04 | New York, US

- Implemented a feature to retrieve the Design Tokens of **Figma** projects directly to new projects via npm command, improving the efficiency of new app deliveries from 40 hours to 8 hours, using **typescript**, **commander** and **figmagic**..
- Lead several projects, by taking ownership of the deliveries and handling the most difficult **logics** and UI using **Vue**, **Pinia** and **Typescript**, but also mentored junior developers to improve their knowledge and problem solving skills.
- Redesigned the rendering system for the **flagship** game, improving frame rate, while integrating **payment gateways** and utilizing **GCP** to enhance transaction processing efficiency.
- Solved bugs and developed new features to a digital visualization software using **React Native** with **Expo**, **Typescript**, **Jquery**, **HTML** and **LESS**, improving the overall user experience and achieving client's needs

Full Stack Developer | Jonny Git | 2016.06-2019.02 | Berlin, Germany

- Developed & maintained **micro front ends** attached to the **SaaS** product using **React** and **Typescript**, delivering frontend applications to handle data provided from **microservices** APIs and real time data from **websockets**.
- Developed and maintained code for in-house and client websites primarily using **React Native**, **Sass**, **JavaScript**, and **jQuery**, resulting in a 60% increase in client satisfaction.
- Created a Design System in **React Native**, **Typescript**, **HTML**, **CSS** (Styled Components) to increase speed in the process of developing new **micro frontends** and unifying user facing components with the Company Brand.
- Completed a responsive website design for a local non-profit organization using **Bootstrap** that saw a 50% growth in online donations.
- Developed a custom **Content Management System (CMS)** with **PHP** and **MySQL** for a small online retailer, improving their product management efficiency.
- Quickly identified and fixed bugs, ensuring the stability and reliability of the application.

UI/UX Developer |Trezo Tecnologia LTDA Blumenau Area| 2014.10-2016.05 |Brazil

- Responsible for Theming and customizing Magento 2 stores. Creating themes from scratch, customizing both Frontend and Backend Development. Solving issues from Magento 2 stores with: Javascript, jQuery, Knockout.js, Vue.js, HTML5, CSS3, XML and PHP
- Software Development Analytics Tool. As a T-shaped specialist was involved in several directions, from UX architecture to direct implementation (React)..

Education Experience

Para State University | 2010.01-2014.05 | Belem, Brazil

Bachelor's Degree in Mathematics and Computer Science

Technical Skills

React, Python, Node.js, NestJS, TypeScript, Next.js, Angular, Vue 3, FastAPI, React Native, Flask, Express.js, PHP, Laravel, SDK, GraphQL, RESTful APIs, WebRTC, JavaScript (ES6/ES7), OpenAI API, LangChain, Stripe, Paypal, MySQL, PostgreSQL, MongoDB, Redis, DynamoDB, Firebase, HTML5, CSS3, Sass, Bootstrap, Tailwind CSS, Ant Design, AWS(EC2, S3, Lambda, RDS, API Gateway, Cognito), Google Cloud(App Engine, Firestore, Pub/Sub), Microsoft Azure(App Service, Cosmos DB, Functions), Docker, Kubernetes, Heroku, CI/CD Pipelines(GitHub Actions, GitLab CI, Jenkins), Microservices Architecture, Serverless Architecture, Kubernetes Helm Charts, Terraform, WebSocket, Three.js, WebGL, OpenGL, OAuth2, JWT Authentication, Redux,Vuex, Pinia, NgRx Zustand, Zustand Persist, Vite, TurboRepo, Webpack, Babel, Nginx, Apache, SEO Optimization, Testing (Jest, Mocha, Chai, PyTest), Agile/Scrum methodologies, Git, GitHub, Bitbucket, Jira, Slack, Trello

Soft Skills

Responsibility, Self-discipline, Problem-solving, Feedback-driven, Adaptability, Non-conflict, Empathy, Highly-motivated, Clear-communication, Mentorship, Leadership, Collaboration, Time-management, Attention to Detail, Continuous Learning, Client-Focused Mindset
